

Main Thought Bubble: OVERVIEW

- Task force info
 - Evaluating the potential uses of Eportfolios
 - Assessing Eportfolio applications/platforms
- EPortfolios can support these university activities
 - Academic advising
 - Program Accreditation
 - Curriculum Development
 - Student Planning
 - Alumni Development
- Task force observed the following:
 - Meet student academic and pro needs
 - Easy to use
 - Capture more than John Hopkins experience
 - Use increases with external motivation
 - Use increases when integrated with other applications
- Eportfolio Overview
 - Ability to document multimedia resources
 - Ability to share and distribute
- Task force listed where eportfolios are in use now
- Discussed next steps for expanding eportfolios across their campus and others.
 - Benefits of wide adoption
 - Challenges of adoption

QUESTIONS:

- Did you get an opportunity to take a look at any sample portfolios listed in the document, or perhaps out of the links Kathleen provided on the discussion board?
 - <http://eportfolio.sfsu.edu/gallery.php>
- Speak to your experiences with 21st Century Skills, and what artifacts you might be able to generate for each (or which ever apply).
 - http://www.ufv.ca/plar/portfolio_tutorial.htm#TOC (useful tutorial site that

Kathleen provided through the boards – refer to EVIDENCE SECTION).

- Since portfolio applications/platforms were one of the main discussion points in the article, can you speak to which platform you think you will use for your EPortfolio? Also, please provide your reasoning for choosing one platform over another. For those who haven't decided, are there any you are leaning towards?
